**New roadway to access middle school site will support residential growth
in the Town of Millet**

Millet, Alberta – Residents of the Town of Millet will benefit from a municipal infrastructure project that will construct a paved, urban-standard roadway to provide access and services to the new middle school site.

The roadway will enable the Town of Millet to construct a new middle school and support residential growth, including the development of approximately 300 homes in the immediate area and 600 residential lots over the next 10 years. The project includes the construction of 450 metres of paved roadway, curb and gutter, storm sewer, sidewalk and street lighting.

Through the Canada-Alberta Municipal Rural Infrastructure Fund (CAMRIF), the federal and provincial governments will each contribute \$710,800 to the project.

Blaine Calkins, Member of Parliament for Wetaskiwin, on behalf of the Honourable Rona Ambrose, Minister of Intergovernmental Affairs and Minister of Western Economic Diversification, and LeRoy Johnson, MLA for Wetaskiwin-Camrose, on behalf of the Honourable Luke Ouellette, Minister of Alberta Infrastructure and Transportation, made the joint announcement today.

“Canada’s New Government is getting things done for the people of Millet,” said MP Calkins. “Today’s investment of more than \$1.4 million will ensure that the Town of Millet can construct a new middle school and support residential growth in the area.”

Johnson said managing growth pressures throughout Alberta is one of Premier Ed Stelmach’s five priorities. “The construction of this road will do more than provide a connection to a new school site—it will also help manage growth pressures in the Town of Millet by creating new housing units,” said Johnson.

The Canada-Alberta Municipal Rural Infrastructure Fund is a joint initiative between the Governments of Canada and Alberta that enables communities to address local infrastructure needs. Over the course of CAMRIF, the federal and provincial governments will each contribute \$88 million in funding for municipal infrastructure renewal.

A minimum of 55 per cent of funding under CAMRIF targets "green" infrastructure projects that contribute to community economic development and environmental quality of life. These include water, wastewater, solid waste, environmental energy improvements and public transit. The fund also invests in recreational infrastructure, tourism and cultural projects, local roads and broadband connectivity. Projects are selected on a competitive basis from applications received from Alberta communities.

Backgrounder

Canada-Alberta Municipal Rural Infrastructure Fund (CAMRIF)

The following project is receiving funding under the Canada-Alberta Municipal Rural Infrastructure Fund (CAMRIF).

Town of Millet

Roadway to access the new middle school site

Combined federal / provincial investment: \$1,421,600 (pending environmental assessment)

In order to access the school reserve site, the Town of Millet will construct a paved, urban-standard roadway. The project includes the construction of 450 metres of paved roadway, curb and gutter, storm sewer, sidewalk and street lighting.

Fact Sheet

Canada-Alberta Municipal Rural Infrastructure Fund (CAMRIF)

Partnership Program

- The Canada-Alberta Municipal Rural Infrastructure Fund (CAMRIF) is designed to address local infrastructure needs in rural and urban Alberta. It ensures all Albertans, whether they live in large, small or remote communities, share in the benefits of infrastructure investments.
- Through the fund, the Governments of Canada and Alberta invest in local infrastructure projects. These projects are vital to sustaining strong economic growth and quality of life in Canadian communities.
- The federal-provincial CAMRIF Agreement provides \$88 million each in federal and provincial funding for municipal infrastructure renewal, reflecting shared federal and provincial priorities. With matching one-third contributions from municipalities, total program funding will be at least \$264 million.
- CAMRIF is implemented by Western Economic Diversification Canada and Alberta Infrastructure and Transportation, and is administered by a joint secretariat.

Program Priorities

- A minimum of 55 per cent of funding under CAMRIF targets “green infrastructure” projects that contribute to community economic development and environmental quality of life. These include water, wastewater, solid waste, environmental energy improvements and public transit. The fund also invests in recreational infrastructure, tourism and cultural projects, local roads and broadband connectivity.
- At least 80 per cent of CAMRIF funding is dedicated to rural municipalities with a population of less than 250,000. The remaining 20 per cent is available to urban municipalities with a population greater than 250,000.
- A total of \$1,760,000 is also available to municipalities for Municipal Capacity Building (MCB) projects. Projects may include, but is not limited to, the acquisition of infrastructure planning software, training to use that software, planning studies to determine the inventory and condition of infrastructure assets in the municipality or the development of a demand asset management system.

Local input and collaboration

- CAMRIF is managed by a six member Management Committee consisting of two federal representatives, two provincial representatives, and two members representing Alberta's municipal associations—the Alberta Urban Municipalities Association and the Alberta Association of Municipal Districts and Counties. The Management Committee develops the Management Committee guidelines and oversees the project review and selection process. Projects are selected on a competitive basis from applications received from Alberta communities. The deadline to submit applications for the first intake was July 31, 2006.
- Applications for the second intake will be accepted in Spring 2007.

Environmental Assessment

- CAMRIF projects are required to successfully complete applicable environmental assessment processes, and funding is conditional on compliance with all applicable federal and provincial requirements.

How to apply

- For more information, contact the Canada-Alberta Municipal Rural Infrastructure Fund Joint Secretariat by phone (toll free) at 1-800-396-0214, by e-mail at camrif@gov.ab.ca or visit the website www.camrif.ca.
