FOR IMMEDIATE RELEASE  
March 5, 2007

**New, energy-efficient fire hall will increase safety for residents of  
Lac Ste. Anne County**

**Sangudo, Alberta** – Residents of Lac Ste. Anne County will benefit from a green municipal infrastructure project that will construct a new, energy efficient fire hall in the Village of Sangudo.

A combined federal/provincial investment of \$346,666 towards the new fire hall will improve safety for residences and businesses, as well as accommodate the County's growing population. The new 5,000 square foot, four-bay fire hall will enable the County fire department to meet the long-term needs of the community and provide more reliable services. The facility will also be less expensive to operate as a result of increased energy efficiency.

Through the Canada-Alberta Municipal Rural Infrastructure Fund (CAMRIF), the federal and provincial governments will each contribute \$173,333 to the project.

Rob Merrifield, Member of Parliament for Yellowhead, on behalf of the Honourable Rona Ambrose, President of the Queen's Privy Council for Canada, Minister of Intergovernmental Affairs and Minister of Western Economic Diversification, and George VanderBurg, MLA for Whitecourt–Ste Anne, on behalf of the Honourable Luke Ouellette, Minister of Alberta Infrastructure and Transportation, made the joint announcement today.

"Canada's New Government is getting things done for the people of Lac Ste. Anne County," said MP Merrifield. "Today's investment of \$346,666 will improve safety for residents and provide a more energy-efficient fire hall to meet the long-term needs of the County."

"This energy efficient fire hall will help firefighters better serve residents of Lac Ste. Anne County, improving residents' quality of life and making our community a safer place to live," said MLA VanderBurg. "Managing growth pressures, improving Albertans' quality of life and providing safe and secure communities are three of the government's five priorities identified by Premier Stelmach."

The Canada-Alberta Municipal Rural Infrastructure Fund is a joint initiative between the Governments of Canada and Alberta that enables communities to address local infrastructure needs. Over the course of CAMRIF, the federal and provincial governments will each contribute \$88 million in funding for municipal infrastructure renewal.

A minimum of 55 per cent of funding under CAMRIF targets green infrastructure projects that contribute to community economic development and environmental quality of life. These include water, wastewater, solid waste, environmental energy improvements and public transit. The fund also invests in recreational infrastructure, tourism and cultural projects, local roads and broadband connectivity. Projects are selected on a competitive basis from applications received from Alberta communities.

## **Backgrounder**

### **Canada-Alberta Municipal Rural Infrastructure Fund (CAMRIF)**

The following project is receiving funding under the Canada-Alberta Municipal Rural Infrastructure Fund (CAMRIF).

#### **Lac Ste. Anne County**

##### **New Fire Hall – Sangudo**

Combined federal/provincial investment: \$346,666 (pending environmental assessment)

This green project involves building a new, larger, energy-efficient and sustainable fire hall in Sangudo that will serve the long-term needs of the County. The building will meet Silver LEED (Leadership in Energy and Environmental Design) standards.

## **Fact Sheet**

### **Canada-Alberta Municipal Rural Infrastructure Fund (CAMRIF)**

#### **Partnership Program**

- The Canada-Alberta Municipal Rural Infrastructure Fund (CAMRIF) is designed to address local infrastructure needs in rural and urban Alberta. It ensures all Albertans, whether they live in large, small or remote communities, share in the benefits of infrastructure investments.
- Through the fund, the Governments of Canada and Alberta invest in local infrastructure projects. These projects are vital to sustaining strong economic growth and quality of life in Canadian communities.
- The federal-provincial CAMRIF Agreement provides \$88 million each in federal and provincial funding for municipal infrastructure renewal, reflecting shared federal and provincial priorities. With matching one-third contributions from municipalities, total program funding will be at least \$264 million.
- CAMRIF is implemented by Western Economic Diversification Canada and Alberta Infrastructure and Transportation, and is administered by a joint secretariat.

#### **Program Priorities**

- A minimum of 55 per cent of funding under CAMRIF targets green infrastructure projects that contribute to community economic development and environmental quality of life. These include water, wastewater, solid waste, environmental energy improvements and public transit. The fund also invests in recreational infrastructure, tourism and cultural projects, local roads and broadband connectivity.
- At least 80 per cent of CAMRIF funding is dedicated to rural municipalities with a population of less than 250,000. The remaining 20 per cent is available to urban municipalities with a population greater than 250,000.
- A total of \$1,760,000 is also available to municipalities for Municipal Capacity Building (MCB) projects. Projects may include, but is not limited to, the acquisition of infrastructure planning software, training to use that software, planning studies to determine the inventory and condition of infrastructure assets in the municipality or the development of a demand asset management system.

## **Local input and collaboration**

- CAMRIF is managed by a six member Management Committee consisting of two federal representatives, two provincial representatives, and two members representing Alberta's municipal associations—the Alberta Urban Municipalities Association and the Alberta Association of Municipal Districts and Counties. The Management Committee develops the Management Committee guidelines and oversees the project review and selection process. Projects are selected on a competitive basis from applications received from Alberta communities. The deadline to submit applications for the first intake was July 31, 2006.
- Applications for the second intake will be accepted in Spring 2007.

## **Environmental Assessment**

- CAMRIF projects are required to successfully complete applicable environmental assessment processes, and funding is conditional on compliance with all applicable federal and provincial requirements.
