Town of Drayton Valley receives over \$3.5 million from Canada's New Government and Alberta Government for wastewater treatment facility

Drayton Valley, Alberta – Residents of the Town of Drayton Valley will benefit from a “green” infrastructure project that will upgrade wastewater treatment by improving energy efficiency and enhancing filtration processes.

A combined federal/provincial investment of \$3,550,000 will go toward upgrading the existing continuous wastewater stabilization lagoons by adding another wastewater stabilization cell, eliminating the existing chlorination system and investing in new state-of-the art, energy-efficient filtration technology.

Through the Canada-Alberta Municipal Rural Infrastructure Fund (CAMRIF), the federal and provincial governments will each contribute a total of \$1,775,000 to the project.

Rob Merrifield, Member of Parliament for Yellowhead, on behalf of the Honourable Rona Ambrose, President of the Queen's Privy Council for Canada, Minister of Intergovernmental Affairs and Minister of Western Economic Diversification, and Tony Abbott, MLA for Drayton Valley - Calmar, on behalf of Luke Ouellette, Minister of Alberta Infrastructure and Transportation, made the joint announcement today.

“Canada's New Government is getting things done for the people of Drayton Valley,” said MP Merrifield. “Today's investment of more than \$3.5 million will provide the Drayton Valley wastewater treatment plant with leading-edge environmental technologies that will improve the quality of wastewater filtration and cut down on energy consumption.”

“Managing growth pressures is one of Premier Stelmach's five priorities, and today's announcement is a step toward achieving this goal,” said MLA Abbott. “These improvements to the Drayton Valley wastewater treatment plant will greatly benefit the community.”

The Canada-Alberta Municipal Rural Infrastructure Fund is a joint initiative between the Governments of Canada and Alberta that enables communities to address local infrastructure needs. Over the course of CAMRIF, the federal and provincial governments will each contribute \$88 million in funding for municipal infrastructure renewal.

A minimum of 55 per cent of funding under CAMRIF targets green infrastructure projects that contribute to community economic development and environmental quality of life. These include water, wastewater, solid waste, environmental energy improvements and public transit. The fund also invests in recreational infrastructure, tourism and cultural projects, local roads and broadband connectivity. Projects are selected on a competitive basis from applications received from Alberta communities.

Backgrounder

Canada-Alberta Municipal Rural Infrastructure Fund (CAMRIF)

The following project is receiving funding under the Canada-Alberta Municipal Rural Infrastructure Fund (CAMRIF).

Town of Drayton Valley

Wastewater Treatment Facility

Combined federal/provincial investment: \$3,550,000 (pending environmental assessment)

This project involves upgrading the existing continuous wastewater stabilization lagoons by adding another wastewater stabilization cell, eliminating the existing chlorination system and constructing a building that will house a perforate plate screen, disk filters and an ultraviolet light reactor.

Fact Sheet

Canada-Alberta Municipal Rural Infrastructure Fund (CAMRIF)

Partnership Program

- The Canada-Alberta Municipal Rural Infrastructure Fund (CAMRIF) is designed to address local infrastructure needs in rural and urban Alberta. It ensures all Albertans, whether they live in large, small or remote communities, share in the benefits of infrastructure investments.
- Through the fund, the Governments of Canada and Alberta invest in local infrastructure projects. These projects are vital to sustaining strong economic growth and quality of life in Canadian communities.
- The federal-provincial CAMRIF Agreement provides \$88 million each in federal and provincial funding for municipal infrastructure renewal, reflecting shared federal and provincial priorities. With matching one-third contributions from municipalities, total program funding will be at least \$264 million.
- CAMRIF is implemented by Western Economic Diversification Canada and Alberta Infrastructure and Transportation, and is administered by a joint secretariat.

Program Priorities

- A minimum of 55 per cent of funding under CAMRIF targets green infrastructure projects that contribute to community economic development and environmental quality of life. These include water, wastewater, solid waste, environmental energy improvements and public transit. The fund also invests in recreational infrastructure, tourism and cultural projects, local roads and broadband connectivity.
- At least 80 per cent of CAMRIF funding is dedicated to rural municipalities with a population of less than 250,000. The remaining 20 per cent is available to urban municipalities with a population greater than 250,000.
- A total of \$1,760,000 is also available to municipalities for Municipal Capacity Building (MCB) projects. Projects may include, but is not limited to, the acquisition of infrastructure planning software, training to use that software, planning studies to determine the inventory and condition of infrastructure assets in the municipality or the development of a demand asset management system.

Local input and collaboration

- CAMRIF is managed by a six member Management Committee consisting of two federal representatives, two provincial representatives, and two members representing Alberta's municipal associations—the Alberta Urban Municipalities Association and the Alberta Association of Municipal Districts and Counties. The Management Committee develops the Management Committee guidelines and oversees the project review and selection process. Projects are selected on a competitive basis from applications received from Alberta communities. The deadline to submit applications for the first intake was July 31, 2006.
- Applications for the second intake will be accepted in Spring 2007.

Environmental Assessment

- CAMRIF projects are required to successfully complete applicable environmental assessment processes, and funding is conditional on compliance with all applicable federal and provincial requirements.

How to apply

- For more information, contact the Canada-Alberta Municipal Rural Infrastructure Fund Joint Secretariat by phone (toll free) at 1-800-396-0214, by e-mail at camrif@gov.ab.ca or visit the website www.camrif.ca.
